

NEWSLETTER MARCH - 2021

Save Animals, Save Humanity

We want to live Happy and Healthy !

Sneha's Care has been working continuously for animals and their welfare. Our team of experts provide professional medical and humane care to injured, sick and abandoned animals in the field and in our shelter. Our team urges everyone to shower all animals with love and care.

Education is the foundation for a better future

We continued our Humane & Vegan Education Programs to various higher secondary schools in the Kathmandu valley. The main objective of the program was to aware the college going students about animal rights, animal welfare and to promote the cruelty-free society. There was a commitment from the students to spread the message to their families and friends and they have promised to show more empathy and love towards the animals and not to harm them in any forms.

Humane and Vegan Education

Say no to animal products

We should stop being selfish to consume animal products to fulfill our needs.

"Animal Welfare Topics" - A must in Student's Course Curriculum

We held a workshop on "Importance of Incorporating Animal Welfare Issues in Course Curriculum" in the capital. The objective of the workshop was to lobby with government officials from the Education Department and teachers to discuss how we can try to include animal welfare topics in higher secondary school student's course curriculum. This would be useful as the students can exhibit these teachings while dealing with animals and would ultimately help in producing compassionate citizens.

Our efforts to incorporate animal welfare issues in course curriculum continues.

Agriculture employs more than 60% of Nepalese

Since Nepal is predominantly an agricultural country where majority of the people are directly involved with the farm industry, we organized training for the farmers as it was felt that there is a need for greater understanding of needs, health and handling of the farm animals. Most of our farmers have very little knowledge about norms and values of animal welfare and are even less aware of minimal welfare standards to follow. The objective of the event was to provide farm animal welfare training to livestock and poultry industries and also commit them to follow the animal welfare standards and certify them.

Training for the farm industry owners and representatives.

Field Treatment / Rescues / Shelter

We continued to provide field treatments for the sick and injured dogs on a daily basis. Depending upon the case severity, we treat animals on the field and also bring them to our shelter for further medication.

This month we treated 87, rescued 36 and sterilized 25 dogs. Currently, we have over 170 dogs, 30 cows, 9 pigs, and 7 goats at our shelter and farms where we feed and look after them.

STERILIZATION

TO CONTROL OVER POPULATION

We are always ready to help, both at shelter and in the field.

Sneha's Care is a non-profit animal welfare organization, based in Kathmandu, Nepal.

We take action to STOP the animals from suffering.
