# A HEARTFELT MESSAGE FROM THE FOUNDER

As the founder of Sneha's Care, my journey has been one of transformation and unwavering dedication. It all began with the loss of my beloved dog Zara, whose tragic death due to poisoning ignited my resolve to make a difference. That grief spurred me to address the immense suffering of animals and the absence of an Animal Welfare Act in Nepal. What started as feeding community dogs soon evolved into a mission to establish a sanctuary for injured and neglected animals.

Today, Sneha's Care provides a safe haven for over 200 animals, offering love, dignity, and care to those in need. The year 2024 marked a significant milestone in our journey. From launching introducing Dairy Animal Welfare Standards in Lumbini Province to rescuing animals in the Bloodless Gadhimai Campaign, we made strides in advocacy, education, and hands-on welfare initiatives. Various events brought together communities to support compassionate living, while our flood relief efforts demonstrated our commitment to both animals and their caretakers during crises.

This progress would not have been possible without your love, trust, and support. As we look ahead, my vision remains steadfast: to create a world free from animal cruelty and neglect. Together, we can continue this journey and ensure a brighter future for all living beings. Thank you for being an integral part of this mission.

# EXECUTIVE SUMMARY

Sneha's Care is Nepal's largest animal welfare organization, serving as the pillar of hope for animals in need. Based in Lalitpur, we have dedicated ourselves to rescuing, rehabilitating, and sheltering animals that have suffered from cruelty, injury, or abandonment. Our mission is to foster kindness, compassion, and respect for all animals while advocating for a plant-based lifestyle that promotes coexistence between humans and animals. Established in 2015, we have worked tirelessly to safeguard the welfare of animals and provide them with a chance at a better life.

This year, Sneha's Care has achieved significant milestones in its mission. We completed an anti-rabies vaccination campaign, provided mobile treatment, and carried out various rescue and rehabilitation efforts. We successfully treated animals for ticks and fleas, performed animal birth control surgeries, and facilitated adoptions, all while continuing to expand our educational initiatives promoting a plant-based lifestyle. Our work extended to responding to an unexpected flood and landslide, where we rescued and treated animals in distress. Additionally, we made substantial progress in our advocacy work, including protests for wildlife conservation and efforts to set dairy animal standards in an additional province, bringing the total to six. Our commitment to reducing animal sacrifices was reinforced by our work around the Gadhimai festival, where we were able to reduce the number of sacrifices and rescue animals in need.

Looking ahead, Sneha's Care is focused on the development of a new sanctuary to provide more space and care for our rescued animals. We plan to expand our outreach efforts and increase fundraising to ensure the success of this important project. As we continue to grow, we remain committed to our mission of rescuing and advocating for animals, and we are optimistic about the future of our work and the lasting impact it will have on the animals we serve.

We are deeply grateful to all our donors, partners, and supporters whose contributions make this work possible. Together, we can create a compassionate world where every animal has the chance to live a life filled with dignity and care.

# ABOUT US

Established in 2015, Sneha's Care has been dedicated to fostering love, compassion, kindness, dignity, and respect for all animals. Based in Lalitpur, we have actively worked to safeguard animals from mistreatment, cruelty, and inhumane treatment. Our efforts include rescuing, rehabilitating, and providing shelter to injured, sick, and abandoned animals within the community.

Guided by our mission to advocate for and ensure the welfare of all animals, we have expanded our initiatives to include managing the dog population and advocating for the rights and well-being of farm animals, working animals, and wildlife. As Nepal's first vegan organization, Sneha's Care is deeply connected to nature and committed to a cruelty-free ethos.

Beyond advocating for the right to life for all animals, we provide support during disasters, ensure their safety, and work tirelessly to end live animal transport while promoting humane transportation practices. Additionally, we actively promote veganism, conduct various awareness campaigns, and advocate for the rights and well-being of animals.

**“The most important thing is to have humanity. It’s not only people who teach you humanity, I learned humanity from these animals. These animals taught me everything.”**

**- Sneha Shrestha**

## Our Vision

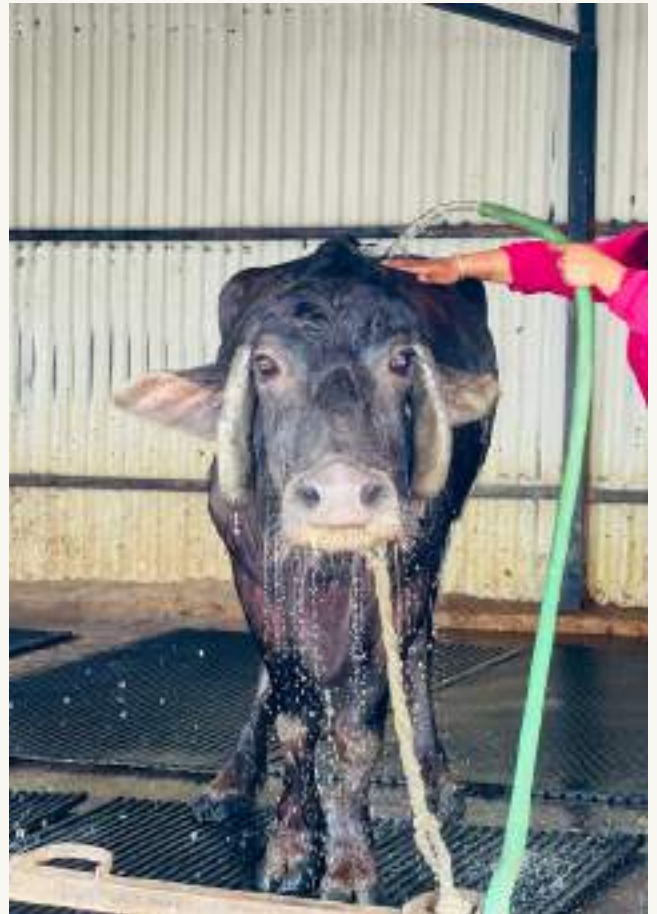

We envision a world where all animals are treated with kindness, compassion, dignity, and respect. We dream of a sustainable community, where plant-based alternatives are chosen instead of relying on animal-based products for food. It's a big vision, but together, we can create a world where every animal knows the joy of a life well-lived.

## Our Mission

Sneha's Care passionately rescues, rehabilitates, and advocates for the welfare of diverse animals while promoting a plant-based lifestyle for a harmonious coexistence between humans and animals.

## OUR OBJECTIVES

- To provide immediate rescue, medical care, and shelter to injured, sick, and abandoned animals in need.
- Expanded Focus on Animal Population Management, Farm animal Welfare, Welfare of working animals in mountainous regions, Wildlife Welfare, Care for captive animals, and more.
- Provide disaster relief assistance to animals ensuring their safety.
- Advocate for the necessary amendment in the penalty system of existing Live Animal Transportation Standard, 2064.
- Engage in advocacy and campaigns to raise awareness and promote animal welfare principles across diverse platforms and communities.
- Promotion of Plant-Based Diet through School and Community Outreach to encourage a compassionate and healthy lifestyle and advocate for cruelty-free food choices.
- Establish a community where love, compassion, kindness, dignity, and respect guide the treatment of all living creatures through community awareness.
- Advocate and coordination with government stakeholders for the formulation of Animal Welfare Act in Nepal.

# THE TEAM BEHIND

## Board Members

*Guiding the organization with strategic oversight and invaluable support.*

## Founder- The Heart

*The driving force and visionary behind the organization with compassion.*

# MAJOR ACTIVITIES

# RESCUE AND REHABILITATION EFFORTS

Rescuing every animal is not always feasible, but certain cases require urgent, 24-hour care and cannot be addressed in community areas. For such cases, we make every effort to provide help and rescue. Once rescued, the animals receive treatment, rehabilitation, and sterilization. We then look for potential forever homes, and if that's not possible, they are released back to their own community. It is a core principle of Sneha's Care that no dog is ever returned to the community without being sterilized, as we are committed to humane dog population control.

Some cases are particularly heartbreaking, such as animals that have been run over by vehicles and left paralyzed for the rest of their lives. For these animals, we provide permanent housing at our shelter, offering them the care and comfort they need for as long as they live.

While our maximum cases are of dogs, we also receive cases involving other animals. In Nepal, there is a significant problem with abandoned male calves, many of which are left stranded on the streets with no access to food or shelter. We frequently encounter cows who have been hit by vehicles or are suffering from hunger and the cold. These animals, too, are given the care they deserve, offering them relief and safety from the harsh conditions they face.

**This Year we  
rescued,**

**115  
animals**

## **HANDLING RABIES SUSPECTED CASES**

**4 dogs  
1 cow**

Rabies outbreaks pose a significant public health concern and can even lead to epidemics. At Sneha's Care, we understand the critical importance of an immediate and effective response to any rabies-suspected case. The health and safety of both animals and community members are our top priority. We are committed to ensuring that these cases are handled with the utmost care, following proper protocols. We believe that a harmonious coexistence between the community and animals is essential, and we work towards preventing the spread of rabies through responsible management and swift action.

## ANIMAL BIRTH CONTROL PROGRAM

# 339

# ANTI-RABIES VACCINATION DRIVES

Sneha's Care is proud to align with the global mission to eliminate rabies by the year 2030. This ambitious goal focuses on widespread vaccination and education to eradicate rabies as a public health threat worldwide. Our Anti-Rabies Vaccination Program is a vital step in this journey, protecting the health of community dogs and preventing the spread of this deadly zoonotic disease.

Rabies is 100% preventable, yet it continues to claim countless lives every year. By vaccinating every community animal annually, we can break the cycle of transmission and move closer to a rabies-free world. Sneha's Care has successfully implemented Animal Birth Control (ABC) and Anti-Rabies Vaccination (ARV) campaigns in Kathmandu Metropolitan City and conducted mass vaccination drives across various wards of Lalitpur Metropolitan City.

# TICK AND FLEA TREATMENTS

While ticks and fleas may seem like a minor issue, they are responsible for the transmission of serious vector-borne diseases, such as Lyme disease, ehrlichiosis, and anaplasmosis, which can be fatal to both animals and humans. These pests can also cause skin irritation, infections, scabs, and allergies. To address this, Sneha's Care has taken proactive steps to reduce tick and flea infestations among our community dogs and shelter animals. Through regular treatments and preventative measures, we strive to ensure the health and well-being of all the animals under our care.

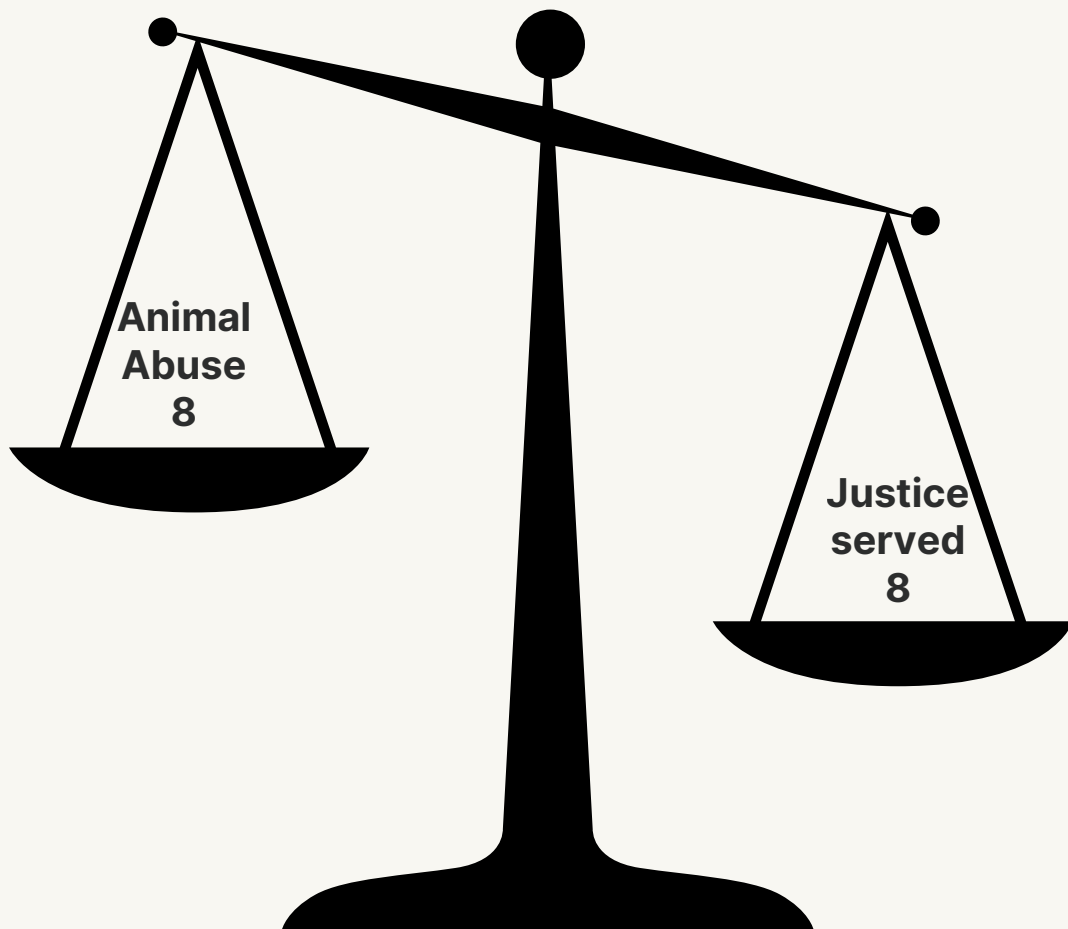

**"Love all beings,  
for in their eyes,  
we see reflections  
of our own  
humanity."**

## CASES OF ANIMAL ABUSE

Despite living in the 21st century, cases of animal abuse remain alarmingly high. We frequently receive calls from concerned citizens about plans to poison or kill dogs, and the reasons behind these actions are often disturbingly irrational. When we investigate these situations, the justifications given are absurd, such as dogs barking too much, watching people eat their food, or following them around. These explanations reflect a lack of understanding and compassion for animals, highlighting the need for more education on animal rights and the importance of humane treatment. At Sneha's Care, we are committed to addressing these cases, providing support to animals in need, and raising awareness about the cruelty animals face.

### Communication

*We received a call about a dog collapsed on a roadside with severe bleeding.*

### Response

*Our team rushed to the site and consulted with the locals on the abuse.*

### Rescue

*Hope was then rushed back to the shelter for treatment. She was transferred to AMC then for further specialized treatment.*

### Culprit Mapping

*We mapped the culprit with the help of local supporters and lawfully detained him for the crime he committed.*

# Kirtipur Dog Abuse Case of 2024

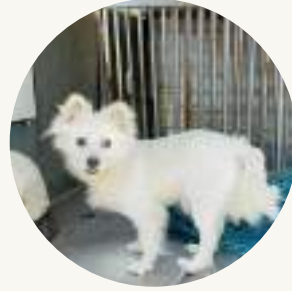

## Story of "Hope"

*Hope got a second chance at life and spent her remaining days surrounded by love and care at Sneha's Care before peacefully crossing the rainbow bridge.*

# COMPASSION

Toffee was a pet dog, but abused everyday by his owner.

A kind person witnessed the abuse and called us immediately.

## Let's have a look at Toffee's Journey

We found someone willing to adopt Toffee.

# ADOPTATE JOURNEYS

**Every animal entering Sneha's Care begins a unique journey. Despite varied paths, we are dedicated to each ones welfare. 13 dogs and 1 cat got adopted this year.**

We gained his trust day by day and worked on rehabilitating him and worked on his trauma healing.

We went to check where he will residing and weather it meets our adoption criteria.

Toffee went to his forever home with other furry friends.

**4  
dogs**

**Animals in Disaster**

**Bloodless Gadhimai  
Campaign**

# INSPECTIONS ON LIVE ANIMAL TRANSPORTATION

We are committed to improving the welfare of animals, including buffaloes, goats, sheep, and chickens, transported to the valley for slaughter. We have been continually advocating for the amendment in the penalty system of existing Live Animal Transportation Standard, 2064 with the Department of Livestock Services, Department of Animal Quarantine and the concerned government bodies of the Nepal Government. Our inspections at the Naghdhunga Checkpoint, a major entry point to Kathmandu, revealed alarming conditions, such as overcrowding, lack of food and water for over 27 hours, and severe injuries due to improper handling. In one instance, a buffalo was near collapse from pain and suffocation, prompting our team to intervene and arrange for better transport. We ensure to educate the truck drivers and traders about the minimum standard they must meet while transporting live animals. While we continue to monitor, advocate, and raise voice against the cruelty these animals face during transport, we urge authorities to enact strict regulations to prevent such inhumane treatment and ensure the well-being of animals in transit.

# COMPASSION AND PLANT-BASED EDUCATION SESSIONS

At Sneha's Care, we believe veganism is key to a sustainable future.

## Topics Addressed

Nutritional completeness of vegan diets and the hidden suffering endured by animals in food production. Connection between plant-based diets and disease prevention, environmental benefits of veganism, including reduced deforestation, water pollution, and greenhouse gas emissions.

2

1

## Aim

To educate students about the benefits of a plant-based diet, raise awareness of animal cruelty, and highlight the positive impacts of veganism on health and the environment.

3

## Misconception Clarification

Misconceptions about animal products being essential for nutrition were clarified by showcasing plant-based alternatives through the "Plate Method" for balanced diets.

4

## Animal Welfare

Discussion on the "Five Freedoms of Animal Welfare" and the current state of animal welfare in Nepal. A documentary by Sneha's Care, depicting the inhumane transportation of buffaloes, left a strong impression, as did discussions on the issue of religious animal sacrifices. These visual and factual presentations encouraged compassion and empathy.

5

## Q&A Segment

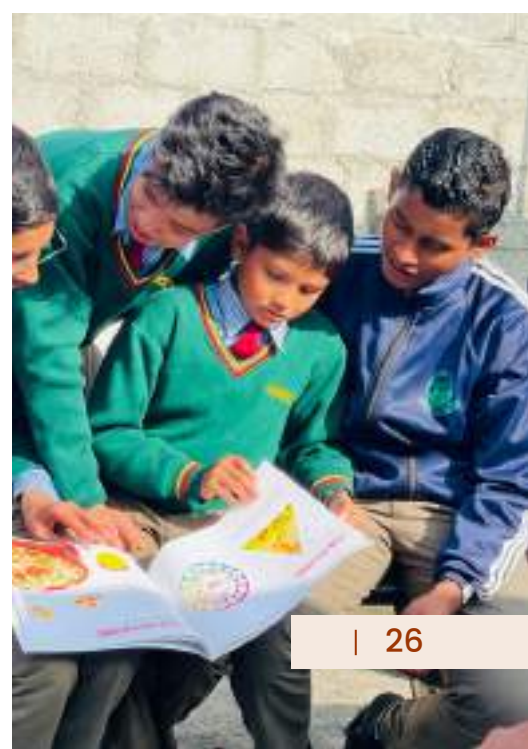

The sessions ended with a Q&A segment, and feedback from students and school management highlighted the value of these programs in fostering moral awareness, as animal welfare topics are absent in the curriculum.

**100 School  
Reached**

**6890

# ANIMALS IN DISASTER

## Flood and Landslide Response

The disastrous floods and landslides had hit various places of Nepal on September 27th and 28th which resulted into a devastating condition. The destruction was unimaginable. Roads had vanished beneath flowing waters, highways were blocked by heavy landslides, and even homes in the city have been submerged, affecting numerous lives leading to 244 deaths. Thousands of animals had been displaced from their homes, animals living on the streets, farmed animals left behind and more.

In challenging times like these, Sneha's Care firmly believes in the power of timely response and treatment. With urgency and determination, our entire team mobilized for rescue, bracing ourselves for the worst. The Nakkhu area, severely impacted by the flood, is home to numerous farms along the riverbank. As a result, countless pigs, goats, and other animals were displaced and scattered across the residential areas.

**23**

Affected animals were rescued

**160  
plus**

Animals were provided with medical attention

**153**

Dead animals were traced and buried respectfully following safety measures

Sample Survey on Animal Losses amongst the locals in the area were conducted.

Consultation and Rehabilitation Support were provided to the affected.

**1024**

Relief aids were distributed to sustain and treat all the affected farm animals with the support of Lalitpur Metropolitan City.

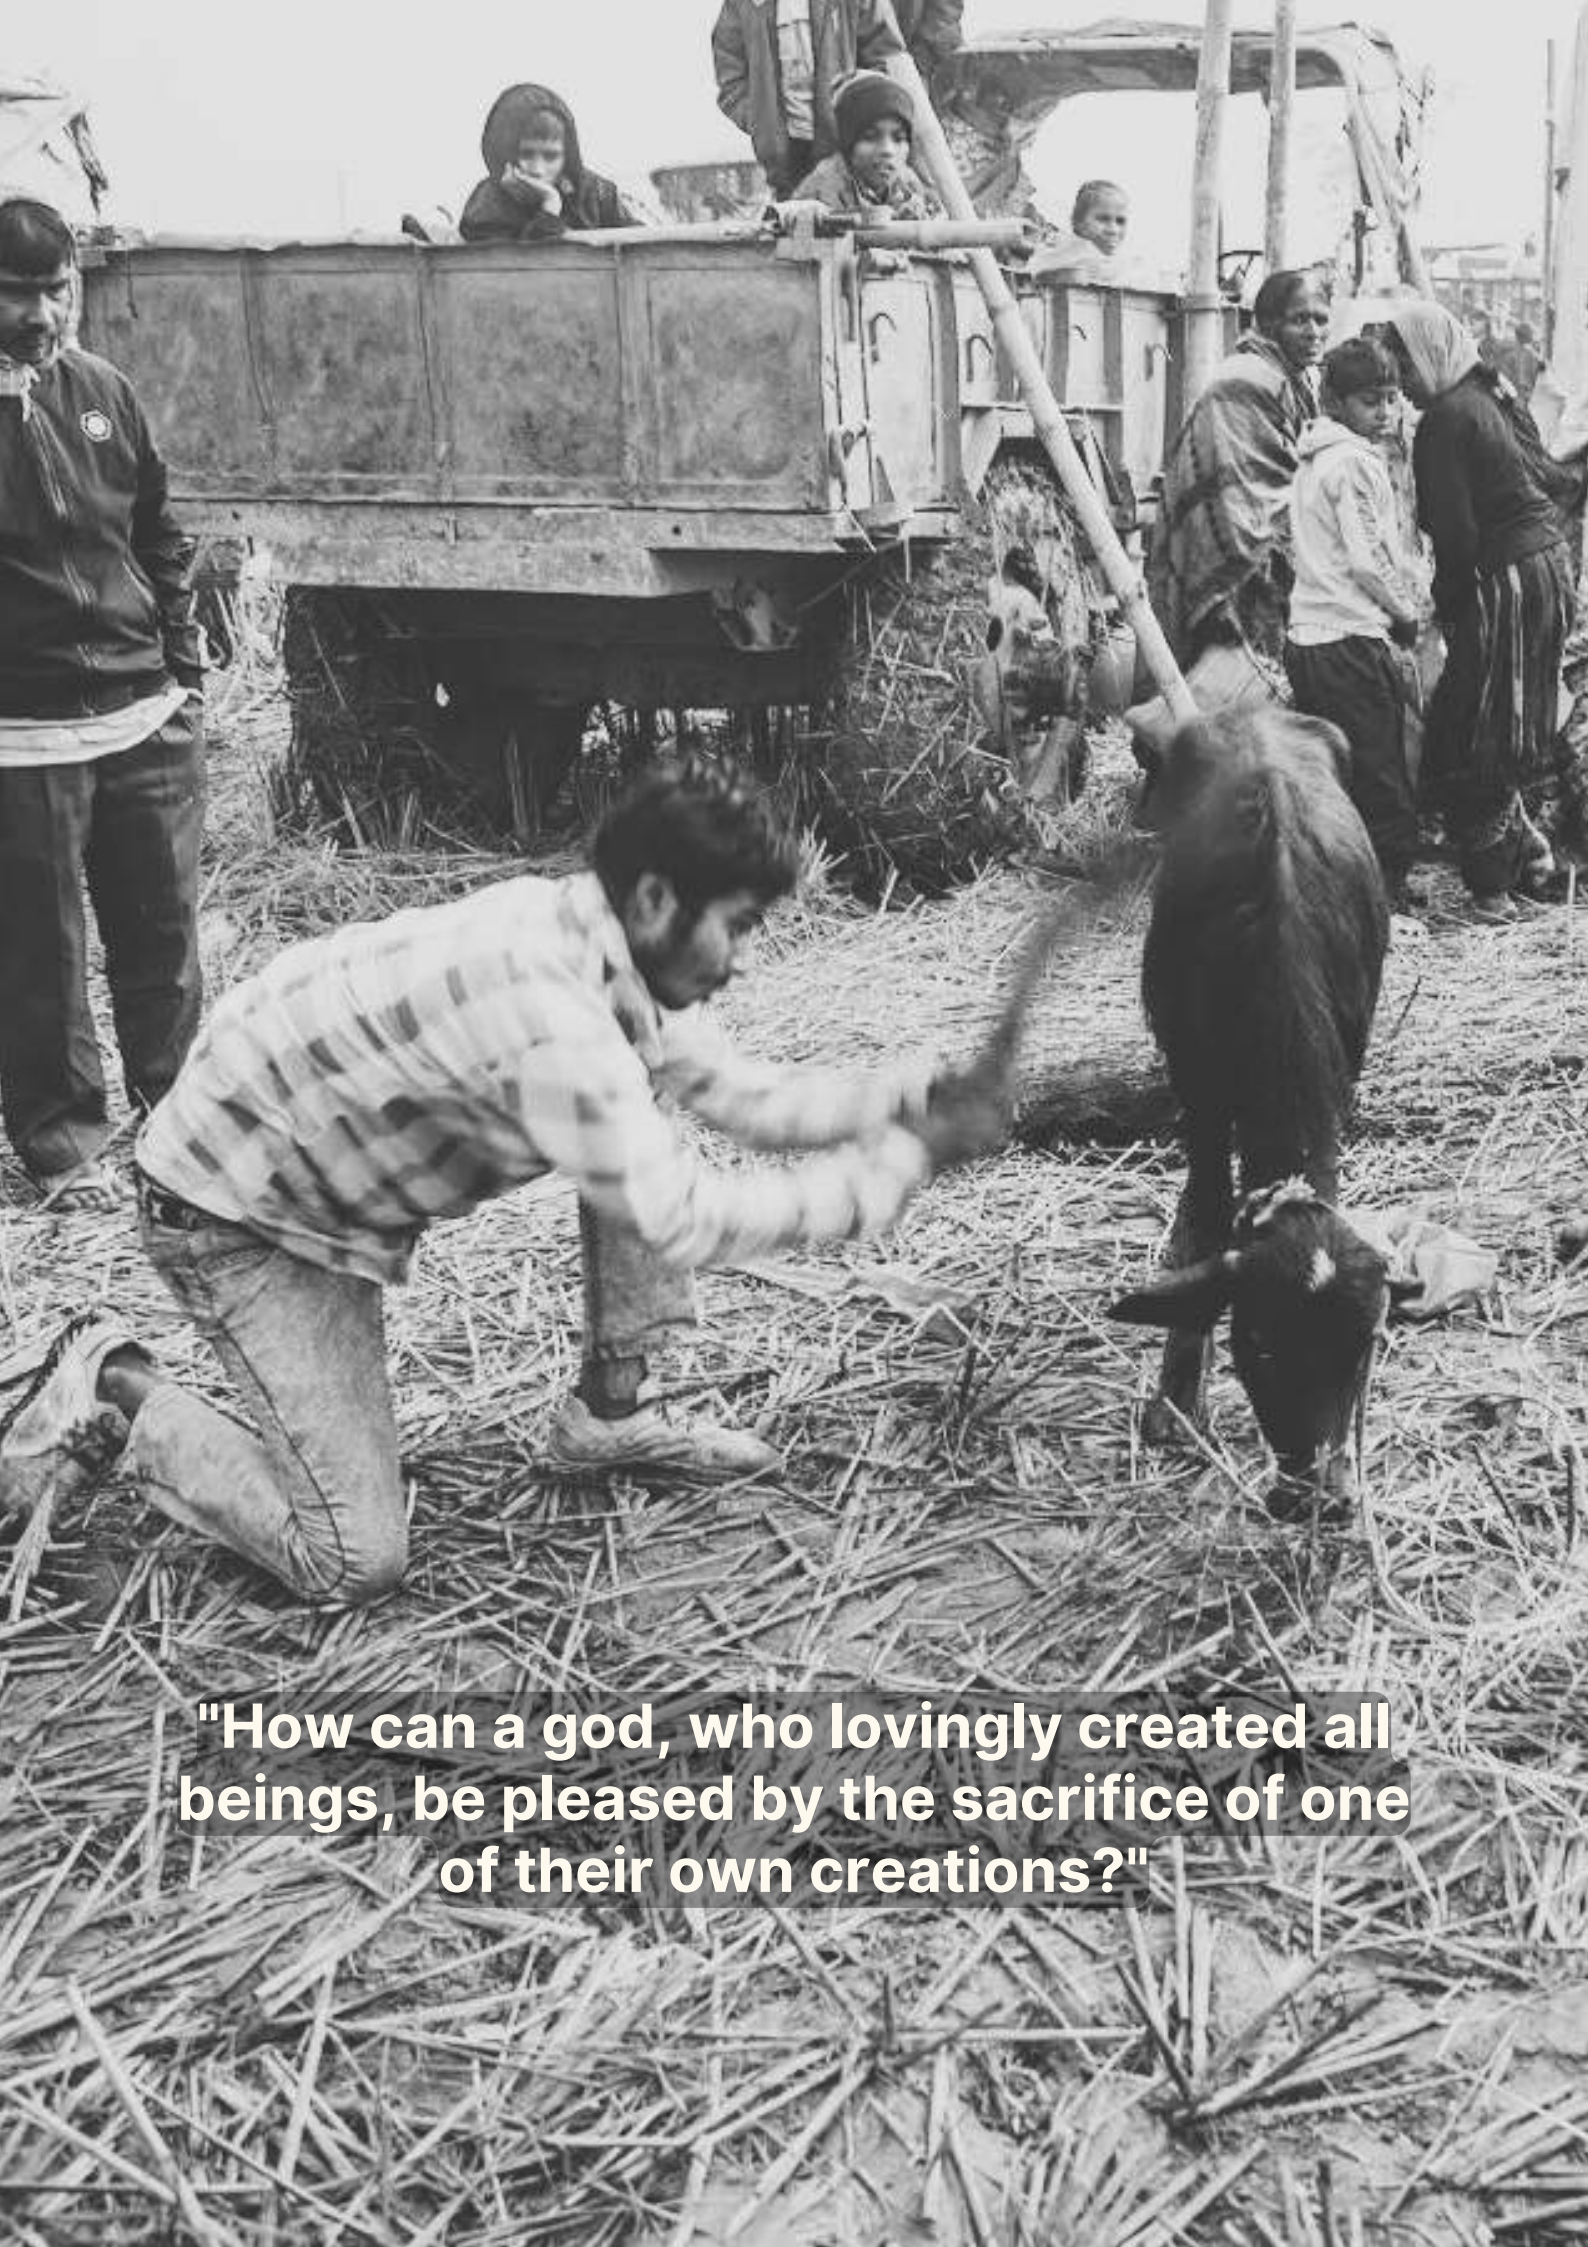

Aside from the impacts of the flood outside our shelter, we also faced a devastating loss within the shelter.

The extreme amount of rainfall and landslide had damaged our isolation zone making it unlivable for the animals residing there.

The flood also damaged our entire food storage, including supplies for both our farm animals and dogs. Additionally, our clinic also suffered significant damage.

Despite the destruction, we are incredibly grateful that all our animals remained safe during the flood. We extend our heartfelt gratitude to our invaluable supporters, whose generosity enabled us to treat and rescue animals, replenish their food supplies, and restore our clinic and isolation zone. Your support made a tremendous difference during this challenging time.

**"How can a god, who lovingly created all beings, be pleased by the sacrifice of one of their own creations?"**

# BLOODLESS GADHIMAI CAMPAIGN 2024

The Gadhimai festival is a Hindu celebration held every five years at the Gadhimai Temple in Bariyarpur, located in Bara District, near the Indo-Nepal border. This event, primarily observed by the Madhesi community, has been historically known for its large-scale animal sacrifices, including water buffaloes, pigs, goats, chickens, and pigeons, which were offered to Gadhimai, the goddess of power.

Despite our long-term campaign, advocacy, and awareness efforts, the Gadhimai festival on December 9th and 10th witnessed the sacrifice of 4,200 buffaloes and thousands of goats. . This festival is a tragic display of blind faith and cruelty.

Our fight for a #BloodlessGadhimai began in 2017. The numbers were reduced compared to the Gadhimai Festival 2019, and we were able to save thousands of animals and pigeons. However, we are deeply saddened by the loss of thousands of lives. Together with other Indian animal welfare activists, we worked tirelessly to reduce the scale of this massacre.

A significant achievement in our efforts was at the Nepal-India border, where we successfully prevented thousands of animals from being transported for sacrifice. Every animal we saved is a step toward our vision of a bloodless Gadhimai.

We would like to express our heartfelt gratitude to the dedicated Indian police force who helped us in this fight against cruelty. Their courage and determination were instrumental in saving lives and challenging this practice rooted in blind faith.

# Major Activities

## Street Drama

With a social message not to participate in sacrificing animals. Rather, one can make wish and opt for alternative peaceful offerings like coconuts and ash gourds instead of offering lives of the innocent animals.

## Religious Speeches

Around 100 participants from the village attended the event where the speaker raised awareness about animal welfare, promote violence free Gadhimai festival, and advocate for animal rights.

## Formation of various groups

We selected 1 animal welfare defender, 1 Animal Welfare Group of women and 1 youth each in 16 municipalities in Bara district for advocacy and facilitation. We also formed a border watch group to monitor the transportation of animals from India to Nepal from mid-September until the sacrifice that took place in December.

## Rescues and Rehabilitation

On the days leading to the sacrifice, we monitored the animals brought in, stopped them at the Nepal-India border and handed the animals to local shelters. We also build pigeon houses to support their conservation and provide for their basic needs.

## Peace Rally

We vocalized slogans for animal welfare and promoting peaceful alternatives to animal sacrifices in both Kathmandu and Bara.

## Discussion on Effective Implementation of the Supreme Court's Mandamus on Gadhimai Festival

The promotion of compassion and non-violence, and by holding relevant stakeholders from the ministries, departments, concerned institutions accountable for their roles, the movement towards a bloodless Gadhimai Festival gained momentum.

## School Education

FAWN selected two government schools in all of the 16 municipalities in the Bara district. Schools in the sacrifice-prone villages were prioritized. One teacher from 32 selected schools had been trained to lead as school focal person to teach animal welfare, anti-sacrifice, and alternate sacrifice for six months.

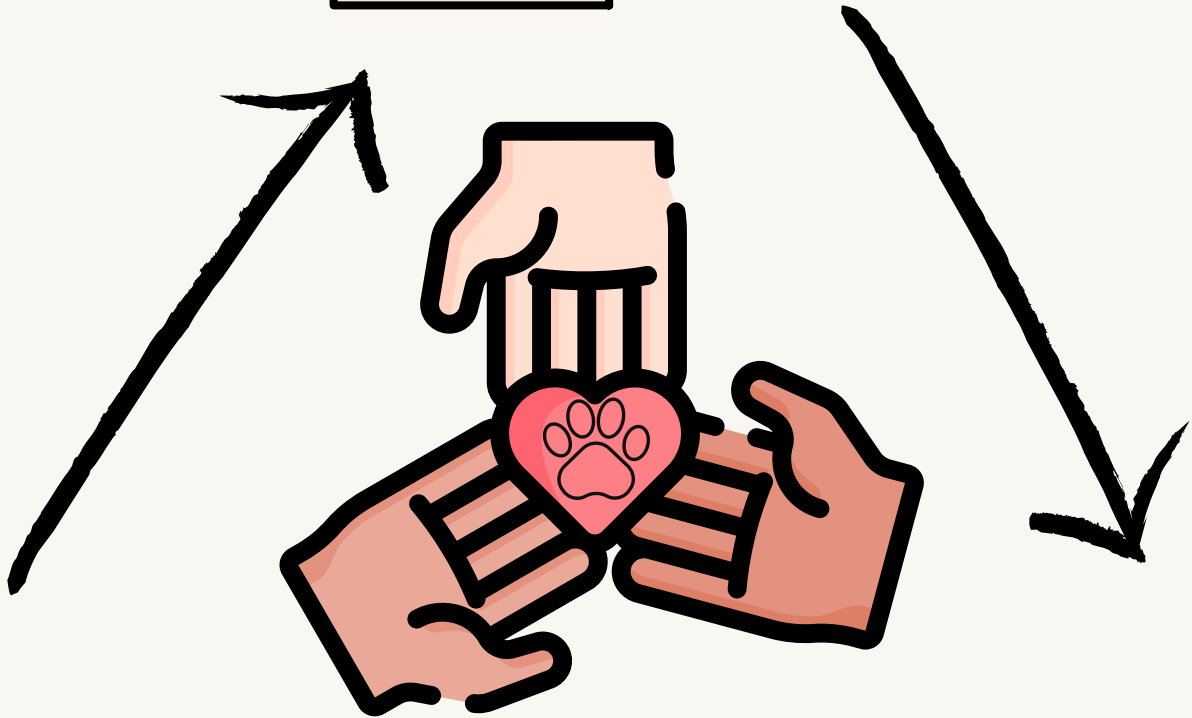

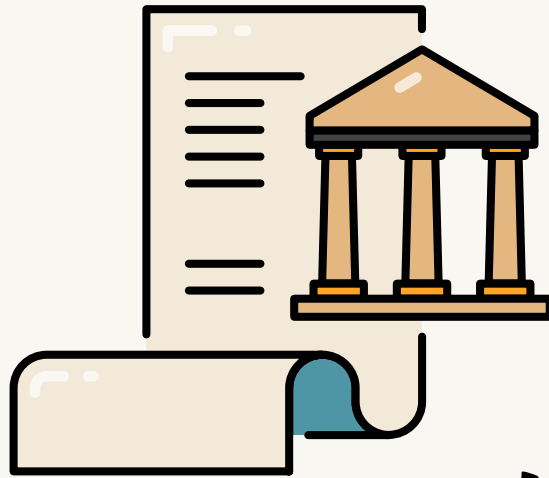

# SURVIVORS OF THE GADHIMAI MELA

*Us*

**"When we unite, we create a powerful force for change, bringing hope, care, and welfare to every animal in need."**

# ADVOCACY AND AWARENESS EFFORTS

## Protest to raise awareness: Wildlife conservation and welfare

On April 2, 2024, a peaceful protest was held at the WWF headquarters to raise awareness about ending animal cruelty and promoting wildlife welfare.

The event highlighted the tragic deaths of three tigers at Parsa National Park within five months, attributed to restrictive enclosures and inadequate management. We along with other protestors emphasized the urgent need for better conservation practices to prevent further losses of endangered species.

With banners reading "Stop Animal Cruelty" and "Tigers Belong to the Wild, Not Captivity," the demonstration called for effective wildlife management and a united effort to protect animals and their natural habitats.

# Dairy Farm Animal Standards set in Lumbini Province

The Ministry of Agriculture and Land Management Lumbini Province in collaboration with Sneha's Care has successfully introduced the Dairy Animal Welfare Standards in Lumbini Province. This standard aims to bring an end to the cruelty that the dairy animals are facing. Our collective aspiration is to ensure that every single dairy animal receives the care, respect, and humane treatment they rightfully deserve.

We extend our sincere gratitude to the Honorable Minister, Mr. Bhandari Lal Yadav, and the esteemed Secretary, Mrs. Namrata Singh, for their dedication in addressing the critical issue of dairy animal welfare and the profound positive impact it has on the lives of these farm animals. This initiative reflects a commitment to animal welfare and sustainable farming in Lumbini province, promising a more compassionate future for dairy animals. Our goal is to ensure that every dairy animal receives the care and respect they deserve, adhering to the 5 Freedoms of Animal Welfare.

Our team visited Lumbini Province and conducted a media briefing/stakeholder awareness session in Lumbini Province, engaging with media personnel, farmers, industries, and stakeholders to promote dairy animal welfare standards. Together, we can create a brighter future for dairy animals and foster a culture of kindness and empathy in our communities.
